

Craig Spencer
CSE 240 Honors Contract
Project Option #2

Instructions

Once the program is ran 4 options will appear. Choose a, b, c, or d depending on what you would like to test. All options except for quit (D) will put you in a loop where you can repeat the action you chose. After each action the program will ask you if you would like to repeat it. Type in y or n depending on what you would like to do.

The meaning to all inputs are spelled to user while running the program.

After creating a new file and inputting a name and email, a random key will be given. This key must be remembered as there is no way to display all files at once.
